The SmartRail Modular Handrail System

- SmartRail is customized based on your project requirements and is optimized for new or retrofit applications.
- Modular systems: parts are shipped and assembled onsite with detailed installation instructions to build your railing system.
- SmartRail is shipped in 16'4" lengths and cut in the field to size.
- LEDs are made with a UL listed, high-quality silicone to ensure: their impact and weather resistance, that they produce a strong output that does not yellow over time, and they maintain their flexibility.
- Installation should only be performed by a handrail installer or skilled contractor. Once installation is completed, the electrician can make the connection to the power supplies.

SmartRail Illuminated System Types

Round Stainless 316 - 1.9" and 1.66"
